

Nicholas Hollins

Software Engineer

SUMMARY

Highly logical and flexible developer with a passion for determining efficient solutions to complex problems. Proven track record of creating and implementing successful front and back-end web applications as well as code design and maintenance.

WORK EXPERIENCE

Software Engineer at AAA Texas, Coppell, TX (Full-Time)

June 2021 — Present

- Used OOP languages such as Java, and GOSU to design, implement, and maintain applications that are often high-volume and low-latency, required for mission-critical systems, Delivering high availability and performance.
- Worked using Agile methodology (SCRUM) participating and collaborating in all sprint ceremonies.
- Helped implement a feature to allow an Emergency Roadside Future Tow option across the 23 states that are partners with AAA Insurance.
- Contributed to UI enhancements on the claims portal to make it more user-friendly that affected 100+ claims agents.
- Developed sound, cost-effective applications to achieve customer needs.
- Used MuleSoft IaaS platform to manage and maintain 10+ company APIs.

Recent Projects:

Guidewire Cloud Transition (Upgrade Project) – Helped in assisting the transition to a cloud environment. Some of the things that I contributed to was converting SQL stored procedures into webservices using Java and following Guidewire best practices to align with cloud standards.

LearnSpace (Full stack Web App) – LearnSpace is a full stack web app that will allow students to track their learning progress and study topics that they are having trouble with.
