Nicholas Hollins

Software Engineer

SUMMARY

Highly logical and flexible developer with a passion for determining efficient solutions to complex problems. Proven track record of creating and implementing successful front and back-end web applications as well as code design and maintenance.

WORK EXPERIENCE

Full Stack Engineer at AAA Texas, Coppell, TX (Full-Time)

June 2021 — Present

- Used OOP languages such as Java, and GOSU to design, implement, and maintain applications that are often high-volume and low-latency, required for mission-critical systems, Delivering high availability and performance.

- I work in an Agile lifecycle setting (SCRUM), participating and collaborating in all sprint ceremonies.

- Helped implement feature to allow Emergency Roadside Future Tow option across the 23 states that are partners with AAA Insurance.

- Contributed to UI enhancements on the claims portal to make it more user-friendly that affected 100+ claims agents.

- Developed sound, cost-effective applications to achieve customer needs.

- Used MuleSoft IaaS platform to manage and maintain 10+ company APIs.

Recent Projects:

Guidewire Cloud Transition (Upgrade Project) – Helped in assisting the transition to a cloud environment. Some of the things that I contributed to was converting SQL stored procedures into webservices using Java and following Guidewire best practices to align with cloud standards.

LearnSpace (Full stack Web App) – LearnSpace is a full stack web app that will allow students to track their learning progress and study topics that they are having trouble with. View on GitHub

Full Stack Engineer at 100devs, Los Angeles, CA (Freelance)

October 2020 — Present

- Collaborated with a team of developers to build modern and responsive web applications

- Designed and established user-friendly websites resulting in a 25% increase in user clicks.

- Applied agile methodologies like SCRUM for project management

- Updated existing websites to make them more mobile-friendly resulting in a 25% increase in user traffic.

- Responsible for troubleshooting and issue analysis, as well as coding, testing, and implementing software enhancements for clients maintaining a 100% uptime.

- Worked across the entire stack – database, business logic, front-end – to implement new feature requirements for 10+ clients.
