Nicholas Hollins

Software Engineer

SUMMARY

Highly logical and flexible developer with a passion for determining efficient solutions to complex problems. Proven track record of creating and implementing successful front and back-end web applications as well as code design and maintenance.

WORK EXPERIENCE

Software Engineer Contractor at AAA Texas, Coppell, TX

June 2021 — Present

- Collaborated with a team of developers to build and maintain the claims portal application.
- Built feature to allow Emergency Roadside Future Tow option across the 23 states that are partners with AAA Insurance.
- Applied agile methodologies like SCRUM for project management

Recent Projects:

Guidewire Cloud Transition (Upgrade Project) – Helped in assisting the transition to a

cloud environment. Some of the things that I contributed to was converting SQL stored procedures into webservices using Java and following Guidewire best practices to align with cloud standards.

LearnSpace (Full stack Web App) – Users can login to their profile and add topics that they are currently learning. Users can also give a difficulty level of the topic they are learning and then add their thoughts on the topic. If the topic level was medium or difficult then they will get the option to create flashcards for that topic. View on GitHub.

Other Projects: On - demand Book Tracker Web App with OpenLibrary API integration, On-demand background color changer for Partnered Twitch streamer, and many more

Software Engineer at 100devs, Los Angeles, CA

October 2020 — March 2022

- Collaborated with a team of developers to build modern and responsive web applications
- Built semantically structured full stack web applications
- Applied agile methodologies like SCRUM for project management

Email Developer at Annie's Publishing | Fort Wayne, IN

October 2020 — June 2021

• Designed and developed customized emails, program guides, and 3rd party emails using HTML5 and CSS3.
• Converted PSD files into email campaigns using Adobe Creative Suite, HTML, CSS and Customer Engagement Suite (Cheetah Digital).
• Performed website maintenance utilizing tools such as Git/Bitbucket, PhpMyAdmin, MySQL, and AWS S3.
• Performed A/B split test on email campaigns.
• Manipulated PHP include files to add updates to website.
